

Dear Residents,

With students moving in from all over the country, dormitories have an increased risk of pest infestations. To ensure that your dorm room stays pest free, please use the following tips to make sure that you aren't inviting pests like ants, flies, cockroaches, bed bugs, or rodents into your home away from home.

- Regularly remove trash from your room and place in the dumpster outside of the building
- Keep all food items in tightly sealed containers
- Quickly clean any spills or crumbs with a disinfectant
- Report any leaks to your Resident Assistant immediately
- Keep your room tidy and clutter free
- Keep suitcases and backpacks off of your bed
- Hang any wet towels and clothes to avoid mold

Most importantly, please inform your Residential Assistant of any signs of pest activity. The earlier an issue is discovered, the quicker we can resolve the problem.

**Keeping a
CLEAN,
PEST-FREE
dorm starts with YOU!**
